Landlord/Property Manager Miscellaneous Functionalities
How to add a property under San Francisco Rent Control?

From your dashboard, click on the "Add new property" button in the upper right corner of the page. Enter any suitable property name, address, city, property photo (if not attached by Google automatically), property type, number of units, and ownership information. Please note that for the San Francisco property location, you need to designate whether it is under rent control or not. To add more details, use the "Edit Building Attributes and Photos" link and click "Save" on the same page.

Follow the video for detailed instructions:
